

International Project Manager

Think you're the one? Apply now!

Do you want to start your career at IMMONTEC, the specialist in immersing tunnels, caissons and wind turbine foundations? We are looking for a Project Manager to lead projects from design to delivery. You will manage major projects such as the Fraser River Tunnel in Vancouver and participate in tenders worldwide, from South America to Asia.

Your Challenge

As a Project Manager at IMMONTEC, you will lead our integrated immersion projects. Together with the Operations Manager, you are responsible for the entire process: from tender and design to execution and delivery. You act as the connecting link between clients, execution teams, subcontractors and other stakeholders.

You monitor progress, quality, safety and budget. You make key decisions, maintain oversight and act quickly when the situation demands.

At the same time, you focus on people: you assemble the right project team, provide coaching leadership and foster a culture where collaboration, learning and high performance go hand in hand.

You will primarily work from our head office in Utrecht, with regular visits to the Vancouver project site. If you already live in Vancouver, it may be possible to keep it as your base. As the project develops, temporary relocation to Vancouver can be arranged by mutual agreement. Extended periods abroad are always planned in consultation.

Who are we looking for?

IMMONTEC is seeking for a Project Manager who is confident, decisive and able to maintain oversight in technically complex, multi-disciplinary projects. Someone who works in structured way, identifies risks, acts quickly and is not afraid to make decisions.

You have strong communication skills and can navigate easily between different parties, from clients and execution teams to international stakeholders. You pay attention to the people in your team, coaching and guiding them while aligning everyone toward a common goal.

You are alert to planning, costs, safety and quality, but also keep the bigger picture in mind. You work independently, proactively and results-oriented with a strong sense of collaboration and the client's best interests.

You also have:

- A Bachelor's or Master's degree in Civil Engineering
- At least 5 years of experience as a Project Leader or Project Manager in civil infrastructure
- Proficiency in English (Dutch is a plus)
- Proven experience in project control, contract and stakeholder management.
- A coaching leadership style and strong communication skills

What we offer

A highly collegial and driven international work environment with plenty of opportunities for training, personal development and growth. A permanent position with the prospect of a long-term collaboration and excellent primary and secondary employment benefits in line with the Dutch construction sector collective labor agreement (CAO).

Key benefits:

- Excellent primary and secondary employment terms
- 43 vacation days per year
- Pension scheme
- Profit-sharing plan
- Company car, phone and laptop
